JOINT
PROFESSIONAL
DEVELOPMENT
FRAMEWORK
(JPDF):
FOUNDATION
LEVEL TRAINING

Joint Professional Development Framework (JPDF): Foundation Level Training:

The Health Services Department at St Mary's Wrestwood Children's Trust can offer this two-day training package, which will be delivered in your school venue. The training is workshop based and offers practical activities to ensure that this vital knowledge is both interesting and relevant to your work with the pupils in your school.

The JPDF was published by I CAN in December 2001. The document sets out the training requirements for Teachers and Speech and Language Therapists who are working with children with speech, language and communication difficulties. It has been endorsed by the Department for Children, Schools and Families, The Royal College of Speech and Language Therapists, The Department of Health and The Teacher Training Agency.

The JPDF was designed to increase levels of collaboration between professionals and is structured in such a way that collaboration is built in at every stage.

The framework is made up of three levels:

- Foundation level
- Core level
- Extension level

This training will cover all areas in the foundation level within the two-day course. These include: the nature of communication, speech and language development, speech and language impairment and the implications for education.

Venue: St Mary's Wrestwood Children's Trust or at your school. We can also deliver to a cluster of schools.

Time: Two-day course can be run on two consecutive days or delivered over 12 sessions of two-hour workshops.

Speaker: Speech and Language Therapist.

Each course participant will receive a certificate of attendance for their CPD file.
